

94.08.22 workshop FRI session 30 speaking Disruptive Students

1. Most schools have students who are noisier than others
 2. They cannot settle down in class
 3. They might affect other children's behavior in class
 4. Something should be done about this
 5. However, I'm not sure that separating them is the answer
 6. Nor should they be constantly threatened

 7. No one can deny that
 8. Students need to study in calm surroundings
 9. Others will be struggling to follow instructions
 10. School is a place where children should apply themselves
 11. Their attitude toward school should be a serious one

 12. Students who ignore school codes of conduct
 13. Selfish
 14. I'm not convinced that ignoring their misbehavior is helpful to them
 15. Naughty children respond better to a strict approach
 16. This is not to say that physical punishment should be administered
 17. Neither is separation a proper solution
 18. Families play so big a role in raising responsible children
 19. Teachers should be trained to deal with difficult students
 20. Rules should be established to ensure that every one follows them

 21. Children who are badly-behaved should not be ignored
 22. They should be managed and not separated
 23. They should be helped to develop a positive attitude
- good luck!
