1. - Form a colony / colonize: live on
2. - On other planets
3. - On earth
4. - Feasible to live: possible
5. - Asteroid سیارک
6. - Asteroid collisions = برخورد سیارکها
7. - Clock-wise در جهت عقربه ساعت
8. - Counter clock-wise: Anti clock-wise خلاف جهت عقربه ساعت
9. - Rotate in a different direction to other planets =
- 10.- Rotate around the sun
- 11.- Revolve / revolution
- 12.- RPM: revolutions/rounds per minutes
- 13.- Sustain life = support life
- 14.- orbiting the sun = revolve around
- 15.- in terms of its physical features از نظر ویژگی های فیزیکی
- 16.- 1) Mercury عطارد/ تیر
- 17.- 2) Venus زهره / ناهید
- 18.- 3) The earth / earth

- 19.- 4) Mars مریخ / بهرام
- 20.- 5) Jupiter مشتری / برجیس
- 21.- 6) Saturn زحل / کیوان
- 22.- 7) Uranus اورانوس
- 23.- 8) Neptune
- 24.- Don't politicize it! سیاسی اش نکن!
- 25.- Insurmountable نمی توانیم بر آن فائق شویم
- 26.e.g.: Today's challenges are seemingly insurmountable but with adequate collaboration we could overcome them.
- 27.- To live on them
- 28.- Let's perform ablution and say two segments, shall we?
- 29.- It's unusual in that
- 30.e.g.: It's unusual in that it rotates in a different direction to the other planet orbiting the sun
- 31.- Substantial progress = big
- 32.- similar in size to earth
- 33.- unlike earth, it does not have any oceans
- 34.- extremely hot
- 35.- thanks to the thick covering of cloud
- 36.- ... which is why ...
- 37.- a further problem is the continual thunderstorms
- 38.- ... which could make life rather unpleasant
- 39.- the surface of Venus has many craters = hole in the ground
- 40.- crates = box
- 41.- as a result of asteroid collisions

42.- next is mercury

43.- unable to sustain life

44.- the voyager space shuttle

45.- Saturn has barely any solid surface as its composition is mostly
gas

46.- it is extremely hot, making life for humans impossible
