

Some people think that it is better to educate boys and girls in separate schools. Others, however, believe that boys and girls benefit more from attending mixed schools. Discuss both views and give your own opinion.

The matter of sexuality has been a controversial issue almost in any subject title, education included. Although most successful schools are ~~the separate_ones~~ some people, myself included, believe that in this era ~~there-it~~ will be advantageous for children to participate in mixed educational places.

The oldest facts about school regulations' goes back to middle ages, showing that students were studying at single sex schools due to social and religious contracts. Boys and girls were taught though for different targets because of holding special duties and there ~~was were~~ no chance of in breaking the rules, in contrast with our perspective toward education in this era. Although this trend continues ~~by-theby means of mines-of~~ educating more successful and worthy students, giving reasons such as more concentration on lessons and more friendly and calm atmosphere not considering the deep consequences of this attitude. For instance, it is a the fact that sexual discrimination was the first reason behind of this method, the perspective which we are trying to pale the significance of ~~it~~ now.

On the other hand, not only is school ~~not~~ the place for education, but also the first place for studying social activities, hence being in contact with the opposite sex gives them the opportunity of figuring out each other's way of thinking. Moreover, if there is a problem based on sexuality, it would be wise to addressing it at school time, otherwise its consequences will be devastating. The less contact, the less information and the more immature perspective toward the opposite sex at ~~the~~ first sight and the issue of humanity in general.

All in all, while there are prosps and cons for the outlook in both single sex and unisex schools, it is worth considering ~~the societies'~~ convictions in toward this issue at the first step because whatever is the family's way of thinking, children are living under the umbrella of social contracts.
