

Some people claim that not enough of the waste from homes is recycled. They say that the only way for increasing recycling is for governments to make it a legal requirement. To what extent do you think laws are needed for people to recycle more of their waste?

Converting wastes and making them ~~as~~ potentially useful materials is one of the most crucial issues in this era because ~~if we fail to do it, not doing it~~, devastating impacts are irreversible and insurmountable, not only ~~do-in~~ environmentally ~~ly, -perspective~~, but also ~~economically. in-economic-one~~. Although this issue ~~is~~ mostly ~~studied studies from an in~~ industrial aspects, some, myself included, ~~believe~~ that home waste recycling process is ~~long term/chronic~~. Hence, ~~the~~ best way is ~~to~~-legalizing it.

Today, ~~thanks to~~ technology, ~~we~~ could reuse almost every material in a variety of ways. ~~By~~ Changing their appearances or analyzing the ingredients, ~~we can use using~~ them for producing completely different objects, so it is clear that there will be more economic benefits. ~~Meanwhile, mine-while~~ the ~~extended expended~~-horizon highlights more serious impacts, which are environmental ones. The less ingredient production, the more energy saving. Air pollution from incineration and contaminated water from ~~land-filling landfills~~ are ~~cited citing~~ as other causes of not recycling, which will be capital- intensive. Hence, it is crucial to ~~spread/extend enhance~~ it to all parts of society, ~~that is in-that~~ legalizing home recycling for some reasons.

Firstly, ~~consisting-introducing~~ laws, the whole society will cooperate in a project, so assurance of being in a same way exists. It is worth mentioning that, according to statistics, ~~without~~ laws the results will not be as much reliable as they ~~are~~ supposed to be. Secondly, scientific and statistical ~~researches~~ could be held more practically for paving the way of improvements of the waste hierarchy, which includes ~~reducereduction~~, reuse and recycl~~inge~~.

All in all, using ~~waste conversion laws converting-waste-law~~ is the key component of modern waste reduction and including homes ~~in to~~ this law will be helpful in recycling biodegradable wastes apart from its social and environmental aspects. Although ~~we cannot it-is-not~~ expected ~~to a sudden~~ change in people's habits ~~any~~ time soon, ~~we can be hopeful that it will happen with time. quickly-after-assenting-~~
