

You need to travel from your home to a place 40 miles away. Compare the different kinds of transportation you could use.

We have different journeys with different experience about casual short or long travel during of our lives. One of the main concerns s all of us have is which kind of transportation we could choose. We have different kinds s of transportation such as public transportation, private car and bike. I strongly believe that the best option for travel is public transportation after that the bike and finally the private car.

The First and foremost reason for the choice of public transportation such as planes s, buses es and trains s is that it is not only the best and safest kind of transportation, but also it is time and moneysaving your time, (and) money. When you compare public transportation with other kinds, you have the opportunity to make new friends s during of travel or read books s, eat something, talk with your friend, play a game in your notebook and also enjoy the sight out. On the other hand , when you compare that with other kinds s of transportation such as private cars s and bikes s you don't have any fear afraid of losing control or even focus when you drive. Moreover, more over public transportation has have highly detailed and varied timetables program (schedule).

Today the benefit (advantage) of mobility, daily physical activity is no not secret to for anybody. In my opinion travelling by bike is a very attractive and helps s you to have strong strength muscles s, get in shape, have more healthy environment and also it 's very cheap , but it is extremely time-consuming. It is perfect for travelling when you don't have any limited ed for time.

My last choice for travelling is taking a private car , it is too so expensive because you must pay for car fuel, parking. Although Despite you have privacy and it is the most dependable way to travel, when using car, (have) involves high risk of accident and increases s of air pollution.

In a nutshell, I personally believe that the best way for travelling is public transportation because it's easy and comfortable.
