

Do you agree or disagree with the following statement? One should never judge a person by external appearances. Use specific reasons and details to support your answer.

When we meet a person for the first time unconsciously we make a first impression about him or her. However, I believe that the judgment by his/her appearance/outfit/attire ~~dress-up~~, or having a richly life is not true, what remains at the end is a good nature.

From my point of view, people are not always the same. For instance, when I was in high school, I had two friends. One seemed amiable and I thought that she would have helped me and another one looked serious and rustic. But when I needed them ~~they~~ needed to help me the second person came forward. From this story I learned that I should never judge a ~~the~~ person by his/her appearance.

Secondly, most of the people wear masks to trick. For example, a person is a beggar and he always sits across the streets, moans ~~hones~~, and people feel pity for him and give him money. After six months police arrested him and found a huge amount of money in his house.

Moreover, we could never determine the intelligence or capabilities ~~fitness~~ of people based on ~~in terms of~~ their families or living place. For instance, some people who are smart may have been growing in a poor family, or a skillful doctor may have an addicted father.

In addition, different people have different opinions about the ~~an~~ importance of a person's appearance. A group of people dress, behave themselves, wear haircuts to make an impression, feel better about themselves and even to make self-realization. But this does not make them kinder, cleverer and more experienced. Unfortunately, people tend to associate these qualities with external appearances.

To sum up, we should never judge humans by external appearances because most of the time is totally different from your opinion and it might disappoint ~~discourages~~ you.
