

In many societies the amount of crime is increasing.

What do you think are the main causes of crime?

How can we deal with those causes?

The amount of crime and illegal acts in any society mostly depends on its population at first. Although there are some crowded cities with low criminal activities, we are observing more and more instances of law-breaking every day in big cities. As ~~the~~ society gets bigger, controlling and enforcement of law become more complicated/get more difficult which ~~it~~ takes more manpower and cost. Governments must spare no effort /try more to prepare a low-risk environment, otherwise more crimes would take place in ~~the~~ society.

Two other main reasons of high rates amount of crime are poverty and limitation in ~~the~~ society. Some social aspects like lack of job and the fragile/bad economic situation of a country in addition to some inappropriate cultural and religious limitation may cause increasing the inclination intention of crime. Controlling the cultural aspect part refers to people and families but about the economic problems, it's the governments who should take the necessary get into the action.
