

One of the consequences of improved medical care is that people are living longer and life expectancy is increasing.

Do you think the advantages of this development outweigh the disadvantages?

Thanks to developments in medical science and technologies, nowadays, people in most countries have a longer/extended more life span than their ancestors and a more comfortable lifestyle. However, But this can be a social and environmental issue which will change the world.

Although a vast range of people around the world do not have sufficient access to proper drugs and medical cares, in developing and developed countries citizens have more and more health caring and new drugs and therapies for age-related/aging diseases or other diseases which reduce the amount of life expectancy such as vascular diseases. The more health care, the longerst life time for people and more comfort.

A longer More lifespan has its own advantages. For instance, people have more time to get along with their family and the overlap of generations will be extended and new generations have more chances to gain elders' living skills. Not only do have youngsters have their parents' mental support for a longer time, but financial support. Both the longevity and quality of life are important, and nowadays, some people have both of them and are satisfied with this subject so that they are living almost a decade longer more than their ancestors.

Having a longer lifespan than before has some drawbacks too. For example, it causes the-amount-of the world population to increase and more population needs more consumption. Then, what we can do with an increased population and a limited/fixed source of food around us. With an-a sudden growth extension in the population of the earth, we are facing a shortage of fresh clean water sources and it has been foreseen that the current century will be the century of wars for water between nations.

In conclusion, having better medical cares and development in this aspect lead people to have a longer lifespan and the next generations will benefit from this development, but we should have proper management on its drawbacks to avoid a backfire. fire-back.
