

Compared to previous generations, an increasing number of people are traveling overseas for holidays.

Why is that? Is this a positive or negative trend?

Nowadays the rate of outward journeys is faced with an steeply upward trend ~~advanced~~ incline. Many people tend to spend their days off abroad visiting other countries and communicating with foreign cultures.

Social researchers believe that the development of passenger transporting facilities, such as aeroplanes and high-speed trains, ~~have~~ has facilitated ~~made~~ trips more at ease and geographically ly far countries are now within easy reach. ~~as reachable targets~~. In addition, the spread ~~generalization~~ of the internet has made the online overseas tours arrangement and accommodation so accessible ~~possible~~ that everybody even by a handset can book hotels and buy plane tickets ~~of planes~~. Besides, web-based communications have increased the number ~~amount~~ of photos and videos of tourist attractions which have been captured and transferred over the net which and this has raised the enthusiasm among audiences to visit landscapes all around the world.

Despite the fact that critics mention a number of downsides, this upward inclination is of great benefit to travelers and target communities in terms of social, cultural and economic factors. The entering of a foreigner to any visiting country is a potential opportunity for both sides to improve their knowledge and share their experiences s. Furthermore, visitors could help ~~the~~ society's domestic economy by spending money for sight-seeing and buying handicrafts as souvenir. Besides, the two-way connection between hosts and guests would evolve their way of life and bring ~~make~~ their beliefs closer and more similar. Quite the contrary, this homogenizing process, from opponents' point of view, would make the local / regional culture and language disappear ~~ed~~, and it is a meaningful drawback that must be considered.

In a nutshell, whether the reason of the boost in tourism which has emerged ~~is-revealed~~ is the convenient transportation means or the bombardment of persuading pictures and movies, I am optimistic about this trend and believe that its merits would outweigh ~~overcome~~ the disadvantages.
