

The line graph shows visits to and from the UK from 1979 to 1999, and the bar graph shows the most popular countries visited by UK residents in 1999.

Summarize the information by selecting and reporting by the main features and make comparisons where relevant.

The line graph illustrates the number of visitors in millions from the UK (going overseas) who went abroad and those that came to the UK between 1979 and 1999, while the bar chart demonstrates the countries which were the most popular for the UK residents in 1999. Overall, it can be seen that visits from and to the UK increased over 20 years, and France was the most preferable place to visit.

To begin with, the number of the visitors started at a similar amount, around 10 billion, and had a rise until 1985. Although abroad visiting experienced a significant rise, it ended at just above 50 million, the proportion of overseas

travelers visiting this country gradually increased over the same period to finally reach just under 30 million.

The most popular country to visit in 1999 was France at approximately 11 million visitors, followed by Spain with 9 million ~~ones~~. The USA and Greece were far less favored by the UK visitors at 4 and 3 million, respectively. The number of people travelling to Turkey was approximately 2 million in the same year, so it (this country) (Turkey) was the least popular country to visit for the UK residents.
