

Some people believe that children should be allowed to stay at home and play until they are six or seven years old. Others believe that it is important for young children to go to school as soon as possible.

What do you think are the advantages of attending school from a young age?

In many places it is common that the parents enroll their children when they those reach to the age of six or seven, while some parents tend to send them to school the public places like preschool at an early age.

Although many parents believe that children at an early age are so vulnerable and leaving them in a new place with new people may be threatens their child's development, many psychological researches demonstrate the same results that there are many advantages by that.

First of all, children interact with their other peers so that their process of cognition highly develops. Similarly, their cooperation and social skills improve significantly, because they communicate with a lot of different people especially others their similar age. Therefore, they can cope with new situations and also socialize with strangers much easier than those who haven't been in such kind of places at an early age.

Another advantage of going to school at an early age is that parents use this time to discover children's talents. If this time has been considered as an opportunity to educate the basic skills of the children with entertaining methods, those children would progress in many aspects of education and life as well. Not only do they play the games, but also they learn some simple and primary lessons to enhance their abilities to absorb the lessons in upper levels in school with less difficulty. As a matter of fact, it needs to be considered as a stepping stone in educational instruction.

To sum up, attending schools from a the young age entails a huge volume of positive results. Many children still spend plenty of their time at home with parents. Instead, parents could benefit from of this time to invest for their future.
