

'Telecommuting' refers to workers doing their jobs from home for part of each week and communicating with their office using computer technology. Telecommuting is growing in many countries and is expected to be common for most office workers in the coming decades. How do you think society will be affected by the growth of telecommuting?

The spread of telecommuting has far-reaching effect on society. It refers to employees who work from home and far from their offices. However, they communicate with their colleges or employees via electronic technologies. By ~~With~~ Using electronic technologies, not only would corporate structure be affected, there would be also changes to social life and even urban life.

By ~~With~~ Working from home the attendance of employees in the workplace would be pretty chaotic so that they would lose contact with their colleges. Furthermore, they more likely would be deprived of having the sense of cooperation/interaction with others. Although disadvantages of telecommuting negatively impact ~~negatively on~~ their lifestyle especially social life, there are more advantages with regard to this issue.

First of all, using electronic technologies decreases a high volume of traffic in peak hours, especially in rush hour when the most office workers go to work in congested roads, telecommuting would be effectively helpful in cutting car use. Besides, ~~besides~~, it could be beneficial in saving energy and time notably in sprawling cities where usually a distance between the workplace and residential areas is pretty long.

Secondly, it could be fruitful for people who have a variety of responsibilities at home. For example individuals who play a role of single parent can manage their time and energy efficiently. For an instance they can allocate a specific time for educating and nurturing their children then they can comfortably devote themselves for working.

In conclusion, if telecommuting has been used in an extensive and well-organized plan not only would the advantages ~~be~~ outweighed the disadvantages, but also it might be a revolution in the businesses ~~business's~~ and commerce world.
