

A large number of death are caused by road accidents. Why do so many road accidents occur? Make recommendations that would help to reduce the number of road accidents.

According to official statistics the third catastrophic event is death that is caused by road accidents, now adays -a-days car accidents s are is increasing because of many reasons for instance -this is illustrated, bad road conditions, vehicle defects errors, and human faults, these are happened everywhere such as developed countries and undeveloped countries.

The faults are made created by humans, high speed driving and overtaking, talking on the with cell-phone, substance abuse using drugs, and drinking alcohol, lead to Led the highest rate of most important mortality, in order to avoid these problems, governments s must be impose create heavy and tough punishment against guilty drivers, for instance seizing vehicle for a long time, sending drivers to special camp, forcing them to assisting-with the police department.

Bad road condition is another reason which occurs makes by poor road design and unfavorable climate condition that must be important for Authorities and government to allocate budget and invest money in to this affair.

The last cause of road accidents is vehicle errors, these include bald tires, Defective car break system, and Lack of mechanical inspection technical-diagnose, in order to avoid this matter, the police department must build dt Special kiosks s by the road before-roads to check Arrival transportations and cars.

In conclusion, although transportation and driving by car are is necessary in our lives but we must respect to others and traffic rules.
