

## Universities should accept equal numbers of male and female students in every subject. To what extent do you agree or disagree?

Obviously ~~the~~ society ~~has~~ ~~have~~ changed significantly from the old era when it was impossible for girls to study in a university or even finish their high school, ~~,~~ on the contrary, ~~,~~ boys were allowed to register for universities easily and achieve their goals. Today as we can see education is a priority for everyone ~~that~~ ~~which~~ ~~has~~ ~~given~~ rise to better culture. In this case I ~~am~~ absolutely agree that universities must accept both genders ~~s~~ in all of the subjects.

Nowadays universities encounter more demand of women who desire to register for various fields. On the other hand, ~~,~~ it is obvious that women's ~~'s~~ education can be ~~conductive to~~ ~~conductive source~~ of earning money in ~~the~~ society.

Moreover, ~~,~~ women in most of the societies are underprivileged but if universities admit an equal number of male and female students, women can show their abilities and interact with others. For example in Arab countries women are deprived of facilities like studying in both sex institutes that will cause less interactions ~~s~~ and relations. Consequently if the government pays ~~s~~ more attention to women's need of education they will ~~enjoy encounter~~ advantageous social and economic conditions.

Some are of the conviction that this arrangement would be challenging and students will have a higher level of competition which causes higher encouragements from ~~the~~ opposite

gender, hence they will study harder and attain ~~to~~ their targets more easily.

To sum up, I believe this action can be useful for both students and universities. The more students they are accepted ~~approved~~, the higher income they will obtain.
