Generally speaking the concept of violence is going to be prevalent such that it is routine enough to be regarded as regular occurrence among people .some people believe that there must be some solution for demolishing the rate of violence even by using dead penalty .however ,the others <u>say</u> <u>said</u> that it could be as violence too hence it is not fair. I am one of the <u>supporters</u> of the idea of halting capital punishment which could be <u>addressed</u> as below while some meaning such as justice and human rights are bold to be as influential factors in this essay.

First of all , by <u>considering consideration</u> some moral concept ,it is really vital to be witness of the feeling of respect among people while there are <u>variety verity</u> of culture and types of rearing methods among people who live in society. Hence, it is inevitable while speaking about the intensity and amount of conflict about <u>today's nowadays</u> individuals and what could be coped with in this part is <u>getting common</u>, <u>questions as to</u> whether punishment such as <u>dead death</u> penalty could be a <u>deterrent decreasing factor</u> while this method itself is <u>a as</u> cruel manner and these days the <u>concept</u> <u>understanding</u> of "an eye for an <u>against</u> eye" is not fair when there are lots of campaigns in which people are fanatical <u>about of</u> human rights and any concept of violence even in conducting justice could be offensive no matter how inhumane the crime is especially because this could be as <u>a</u> prevalent <u>trick</u> for governors to use against their oppositions in such society with political problems.

On the other hand there must be some sympathetic feelings about the grieving graved families and moreover the misconception of committing a crime readily in society .therefore, sometimes some politicians are in this idea that there must be some red-district in committing a crime with invasion beyond it could be responded by capital penalty because of this transforms the ambience of society really dark and there must be some preventive measures solving regardless of how cruel this solution could be such as death penalty.

To sum up, it is incumbent on <u>governments governors to</u> decreas<u>e</u>ing the rate of violence by using cultural solutions and much more besides, although <u>it might be necessary to maybe it is needed to</u> consider some <u>monetary capital</u> fine in some cases against some crimes depending on however effective the crime is . I am of the <u>opinion that attitude in which replacement of</u> community service instead of capital <u>punishment/execution penalty</u> is recommended.
