

Some people believe that adults should follow their traditional culture. Others, however, think that it is not necessary in the modern society. Discuss both views and give your own opinion.

The function of culture is to enrich national identity and it has/plays an incredible role in all societies. However, we could not ignore the ~~affection-effect/impact~~ of technology in our modern life.

I would start the discussion about my country "Iran" ~~which is -Iran is one a country~~ with a rich culture. Other countries ~~maybe do not want/ or~~ may not desire or cannot be proud of this kind of civilization, but we should honor our great civilization. what strikes me most is ~~that despite thee cultural diversity, we have enjoyed a good understanding among different ethnicities.the diversity of the culture whereas It- was strengthen understanding among wide variety ethnic groups whom lived in this country~~ since long years ago. There are questions as to why tradition is significant. Traditions give us a sense of connection with the past; ~~it-they~~ can bring people together and reminds us of the memories that we share. Customs promote national integration for ~~their a nation's~~ people. A considerable achievement of customs is ensuring social stability.

~~Besides,~~ another theory was developed ~~which posits that and it was~~ being modern and living with new lifestyles ~~are is~~ more important than ancient/~~traditional~~ lifestyle. I think ~~this hypothesis it-was has~~ arisen just because of people who ~~were was-being~~ up~~to~~date and become more trendy. Moreover, we do not want to lose interest in enjoying higher standards of living due to traditions. Not only should we not maintain the status quo, but also we should make a leap forward.

In a nutshell, traditional culture is rooted in our existence ~~and is as important as modernity~~. We should ~~equally~~ give ~~equal more~~ attention to both parts and it takes some adjustments. Traditions transmit accepted values to future generations and modern life has made our lives easier and more comfortable.
