

**Some people think men and women have different natural abilities that make them suitable for different types of work. Others, however, believe that both men and women can be equally suited to do any type of work. Discuss both views and give your opinion.**

Every individual has (his/her) own individuality. Nature has caused both men and women ~~to~~ ~~(to)~~ have their individual characters. All these different personalities enable them to do different tasks. Due to this, some people opine that it would be better for both sexes to have tasks which suit their personality and skill sets. Others, however, think that both of them are equal and they can do ~~every each~~ job. Therefore, this essay would analyze both perspectives.

To begin with, it can be said that both males and females have their own character~~istic~~ ~~istic~~ which enables them to perform well in certain tasks. For example, women can be responsible for ~~housework~~ ~~house-work~~ and bringing up children, inasmuch as women are kind, and they are best suited for this job. Similarly, there are matching points between men's activities and their personality. For instance, men are physically stronger than women. These qualities make them suitable for earning ~~livelihood/making a living bread~~ and making decisions for their families. Apart from that, they can also support their families emotionally as well as ~~in~~ security matters.

Despite the qualities that have been mentioned in ~~the~~ previous paragraph, we cannot ignore the changing trend which is taking place in the modern world. Nowadays people are speaking about equal rights and education~~s~~ more than ever before. This ~~have~~ ~~has given~~ ~~women the opportunity to overcome~~ ~~occasional women-breaking~~ obstacles to their outdoor working. They can appear in important positions such as being a politician. In the same way, men also do housekeeping tasks by looking after their children and doing chores. Thus, ~~it~~ cannot be said that both of the genders are ~~designed suitable~~ to do only one type of work.

From my point of view, women are performing well in profession~~s~~ like teaching, ~~and~~ nursing, ~~and~~ those kinds of jobs suit~~s~~ their natural talents and skills. On the other hand, men can work in places where strong physical labor is needed.

In a nutshell, it can be said that apart from individual~~s~~ and different abilities to do several tasks, considering today'~~s~~ current norms both males and females, it will be wrong to think they cannot do each other's responsibilities.
