The internet has transformed the way information is shared and consumed, but it has also created problems that did not exist before.

What are the most serious problems associated with the internet and what solutions can you suggest?

Nowadays life without the internet is unbearable and tough. Imagine you should reserve some hotel accommodation or a table in a restaurant or a train ticket in advance but without This vital facility you lose your worthy time and energy.

First of all, cyber-crime gradually increases, people must care about their credit card information or fake web pages which are created by hackers and appear during electronic transaction, against these frauds people should not advertise their finance secrets to strangers and they should update their electronic gadgets and smart phone.

Second, during the contemporary era people prefer to use social networking sites.

For instance, face book, twitter and so on, and also people tend to improve their virtual life and lost lose daily face-to-face interaction and conversation. This manner should change to real communication between individuals because people have emotional and spiritual feelings.

 Moreover, immature adolescentsce who enjoys web browsing confronted pornographic photos which is are not suitable for one's their age. Youngsters tends to play video games which are Full of Crimes and cruelty, this artificial life style creates makes several problems for families and society, parents should motivate their children To have a natural social life.

To sum up, although the internet has some drawbacks and problems which are do not exists in the past, but wise usage should apply this irreplaceable and essential tool.
