

**When a country develops its technology, the traditional skills and ways of life die out. It is pointless to try and keep them alive.**

**To what extent do you agree or disagree with this opinion?**

**You should write at least 250 words.**

There is no doubt that 'the development of technology is one of today's controversial issues', has surrounded ~~the~~ whole ~~around the~~ world and needs an **in-depth** argument. I certainly disagree with this opinion. In addition, I believe that there is no conflict between technology and traditional skills. In fact, the technology can cause\trigger the advancement of ways of life.

Basically, we\humans have been moving on from previous ways of doing things\ a lot of actions. Moreover, the history of civilization has been illustrated from discovery of fire to invention of the wheel to ~~the~~ advent of ~~the~~ internet. ~~Although,~~ those developments have affected humans' lives detrimentally, beneficial influences such as easier access to everything, ~~and~~ long distance communication have not been deniable. Further, ~~the~~ technology can be ~~of~~ help ~~to of physical labor a human's labor in which~~ there have been many progresses in the agriculture, constructions and industries. For instance, I, as an architect eagerly opine that the technology makes it quite faster to design with the perfect accuracy. As such, combining the use of many applications like Revit-Architecture and 3DS Max with my manual tasks leads to ~~my interest impose on me cordially~~.

~~On an in~~ other words, art-enthusiasts who get absolutely engrossed in conventional ~~hand-~~crafts/~~handicrafts~~ are constantly trying to preserve such traditions. Besides, there has always been a great regard for them although many people prefer ~~the~~ ~~modernization~~. For example, it seems that the classic style ~~are-is becoming~~ ~~trendyed~~ again in fashion shows and ~~fans'~~ number of both exterior and interior architectural design in the classic method ~~is are~~ increasing obviously.

To conclude, ~~not only have~~ ~~not the~~ technology ~~not created~~ obstacles but also it has ~~have~~ been one of the crucial aspects for traditional skills ~~and~~ ~~ensured~~ a better life. Especially, when these two kinds of issues combine with each other in many progresses.
