

Some people believe that children should be allowed to stay at home and play until they are six or seven years old. Others believe that it is important for young children to go to school as soon as possible. What do you think are the advantages of attending school from a young age?

Give reasons for your answer.

In today's lifestyle, it is clearly obvious that children's knowledge is gradually increasing. Although there are some people who believe that children need to start their education as soon as possible, on the contrary, for others including me, it is more ~~considerable-beneficial/useful/helpful~~ to see them as a ~~gifted fertile~~ kid. But in general, ~~there-it~~ would ~~be have been~~ beneficial for pupils when they go to school sooner.

First of all, from my perspective, the age of ~~the~~ education is not the most crucial ~~thing-issue~~ in children's longevity. It can play ~~as~~ an influential role in their life. As such, families who think that offspring should be enlisted to school at a particular age, for example at ~~7~~ age 7, definitely after finishing their nursery school, are worried about children's feeling of being uncomfortable and ~~under pressure forcible~~. ~~To-in~~ my estimation, this is an accurate opinion. Moreover, not only do kids experience enough of family atmosphere, but also have more opportunity for ~~utilizing-enjoying~~ their childhood period of life. For instance, one of my casual friends ~~s~~ whom I have been in touch with for a long time, said "I wish I were a child and ~~do-did~~ not ~~do~~ my best ~~to be for-being-as~~ the most dignified offspring when my parents forced me to go to school at ~~5~~ age 5.

Second of all, ~~when kids attend school at an early age,~~ ~~this~~ can ~~affect~~ considerably ~~affect~~ their different relationships. The result is that getting on with their peers really well, pupils ~~who~~ have been allowed to decide to start their education as soon as possible. Furthermore, their confiden~~cets~~ leads to help to develop their acquisition faster.

~~to~~ conclude, in ~~these-this~~ rapidly changing lifestyle, children's mental flourishing is obvious. In fact this clearly debunks the idea that the age of enlisting them to school is not important as well as their role in society in foreseeable future.
