

In many countries these days, the number of people continuing their education after school has increased, and the range of courses available at universities and colleges has also increased.

Dou think this is a positive or negative development?

~~With technological developments~~ ~~By developing the technology~~ and global changes, the need ~~for~~ ~~of~~ academic education is felt more than before. To that end, the demand for education and the range of courses at universities ~~is~~ ~~has~~ increased extensively ~~which~~ ~~it~~ can be a positive development toward ~~rising~~ ~~raising~~ the level of awareness and knowledge of individuals.

People wish to enter the universities and gain academic achievements. Not only ~~do~~ ~~they~~ have ~~they~~ professional skills, but also the job opportunities. Obviously, as the unemployment ~~rate~~ has an ~~additive-upward/rising~~ trend, most of ~~the~~ work places and companies employ educated and informed ones. Therefore, the hope is that when they enter the university, they can gain the job skills and the abilities needed for their ~~future~~ career ~~future~~. In addition, various courses available at universities and colleges enhance the desire of people to study.

Moreover, as the courses are more detailed, the occupations will be more specified. It results ~~s~~ in improving the career status and employment. Regardless of ~~the~~ positive development, there are some disadvantages too.

Some of the courses are not associated with the needs of society ~~which meaning~~ ~~it~~ ~~means~~ that the demand and the economic basis of a country should be considered. According to this factor the irrelevant courses can be limited. Apart from that, university fees are really ~~/excessively~~ high and the people have to pay a large amount of money for their education ~~to the extent that~~ ~~As long as they become graduated~~ ~~but~~ ~~remain~~ ~~unemployed~~. It is one of the most important concerns in most ~~of~~ societies. Especially in developing countries, as the statistics shows a large number of unemployed educated people, the government should ~~set~~ ~~provide~~ facilities to make job opportunities.

In conclusion, in my opinion we cannot ignore the positive development ~~evolution~~ to make ~~/help~~ a society included ~~d~~ the cultured individuals ~~which~~ ~~and~~ ~~it~~ directly ~~has~~ ~~a~~ ~~favorable~~ effects on education and training of ~~the~~ next generation of ~~the~~ society.
