

## Task:

**Some people say that having a lot of TV channels is good, while others argue that it reduces the quality of programs. Discuss both views and give your own opinion.**

Nowadays, in many countries tens, if not, hundreds of TV stations are broadcasting programs. While some argue that it would be far better to have limited TV channels, I do believe that it is a positive development.

It is often felt that numerous TV channels will lead to low-quality program production. Producing high quality TV shows such as series, movies and news is an excessively time consuming task, for they consist of various activities ranging from recording, composing music to edit all of which require quality time. Thus, from the opponents' perspective, producing a lot of TV programs causes s that less time to be allocated d to each program which in turn could reduce the quality. In addition, novelty plays s a pivotal role in producing eye-catching programs. However, with the increase in the number of by-increasing TV channels, is creating new ideas would be a demanding job to create new ideas, so it would be quite common if producers duplicated ideas which are used in other channels, and, therefore, this would will trigger producing low-quality programs.

I, however, do believe that having a lot of TV channels is beneficial. Having e numerous channels could lead to professional channels. Simply put, each channel produces s programs in a particular field. For instance, these days there are quite a few channels which just broadcast either news or movies. This trend could lead to high quality production in that they focus on a particular subject and recruit individuals who are expert in that subject. In addition, I would argue that having numerous channels could launch cut-throat competition among producers which in turn could enhance the quality of programs in order to attract more viewers/audience. Thus, individuals benefit from this competition.

In conclusion, I do believe that having a lot of TV channels could raise the quality.
