

As can ~~we~~be seen from the maps, the area of the Islip town centre witnessed considerable ~~will~~ change over plans for its development.

The road bisecting the area was straightened and on both sides various developments took place. On the north side of the countryside will be placed a shopping center, car park and bus station. They will remove the main road and replace it with a pedestrian side walk. On the south side of the road the main road will extend with new housing built. On the west side they will demolished the shops and ~~it~~ will be going to develop new housing. Also on the west side the shops will be replaced with new a bus station. The pedestrians were made to walk between the shops and bus station and car park.

In summary, the construction will mainly be made to facilitate affairs for the people who live in this town. Furthermore, roads have been made for walking as well as vehicles and the whole ~~contractions-constructions~~ seem ~~like to have~~ has been made with a good planning.
