

Nowadays, international tourism is the biggest industry in the world. Unfortunately, international tourism creates tension rather than understanding between people from different cultures

To what extent do you agree or disagree with this opinion?

When people discuss the impacts of international tourism, they have different opinions. Some people think that this ~~don't~~does not help the international understanding, while others believe it is helpful to increase ~~it~~international understanding. In my view, there are many reasons to think that this will improve global awareness ~~international understanding~~ in ~~the~~ peoples' different cultures.

First of all, it helps in widening promotion of culture. In the world, every country has its own distinct society and cultures. For example, an Italian person can better understand the Asians by visiting any Asian nation and come to know how young people respect their elders in their society. Good cultural values which are absent from one's own society can be adapted from other societies. Moreover, International tourism aids in learning foreign languages. Learning a new language enriches knowledge and experience.

Finally, Tourism provides the real experience of things and History. We have seen many things ~~in~~on TV, ~~the~~ internet and movies, but a visit to that place makes us closer to that thing.

To sum up, it is clear that tourism is important to people of different cultures. The above discussion shows that it not only provides one with the opportunity to know about other cultures, languages, history but also enhances the possibility to learn and ~~experience~~enjoy the first-hand experience of many realities.
