Opinions vary on whether students <u>should have</u> a gap year before going into higher education. Discuss the possible advantages and disadvantages of taking a year out. Do you believe that taking a gap year is good idea.?

There is no doubt that <u>a gap year</u> is essential for students who need to broaden mind, refresh mood and energy but there <u>are is a fundamentally varies various approaches</u> as to how to spend this gap year. Prom my stand point, working experience during this period is compulsory and one should encounter and <u>get familiar</u> with all aspects of it.

The first and perhaps the most significant reason is that, a practical environment changes one's view about field of study in university. For instance, in the academic world one complicated scenario problem could be solved with some solutions which were approved in the pastlast but in the practical world the conclusion and solution will not be achieved until several trials and errors and research have been done about the subject. This attitude can develop student's solution manager manner and one can challenge with all different scenarios.

Another key point <u>is</u> to justify this approach, after finish<u>inged the</u> gap year, the student who has work <u>experienced</u> can <u>get accustomed</u> to university field mastery due to the practical achievement. This view, During higher education time can be useful for <u>a student</u>, imagine <u>a professor creatinge a sophistical scenario</u> the one who has academic and operational experience can solve the scenario quicker and one can offer <u>an</u> effective <u>solution</u> for it. this causes the professor <u>to count</u> on him or her.

To sum up briefly, in terms of the brilliant education period <u>students</u> can invest the invaluable time <u>for in</u> gaining and <u>experimenting</u> new ways of field study. this could be <u>a great result</u> for his or her future work and resume.
