

**Although more and more people read the news on the internet, newspaper will remain the most important source of news for the majority of people.**

**Do you agree or disagree with that statement?**

Nowadays, there are many people all over the world who like to know about news and especially breaking news about what is happening around the world. ~~The~~ people often prefer to use the internet as the most common medium instead of newspaper. I believe that there are many reasons for this choice.

On the one hand, the internet is a wide source of news and information. There are many reliable news websites which are accessible for each person. ~~The~~ people could simply read the news everywhere and any time via smart phones, computers and laptops. In addition, searching for some news on the internet and watching some photos and videos that are related to them ~~is are quite~~ more effective on people than reading newspaper. Furthermore, people do not have to pay money every day to buy a newspaper as/because the internet is more economical. Also the news of newspapers as opposed to the internet is second-hand and for this reason people prefer to know firsthand /fresh news through the internet.

On the other hand, published online news is better than the printed ones. This medium has several benefits such as decreasing production of garbage, protecting natural resources and avoiding cutting down trees, therefore, some believe that publishing news on the internet is eco- friendly. For instance, expired newspapers in my country have different usages like buying some vegetables ~~into~~ newspaper or cleaning windows with newspaper and much more besides, but it will change into garbage very soon. Also, providing many papers for publishers is quite capital-intensive and is harmful for nature.

In conclusion, I opine that when we could use the internet to read the news, which is economical and accessible, why should we buy a newspaper?
