

Explain why you do or not favor the enforcement of a mandatory retirement age so that more job opportunities can be created for young people.

The age of retirement is a controversial topic in every society. One group believe we can gain more experience from adults so we need them. ~~Another the other~~ one ~~believes-holds~~ we live in a steadily changing world and moving forward needs new blood and dare to venture ~~new areastheir businesses~~.

It is a fact with the speed rate of technology old methods become expired and if you want to move ~~in~~ coordinat~~ione~~ with these changes, you should be up to date.

In my opinion, learning new skills and put~~ting asideaway~~ what you had been doing for 20 years is a big deal, hence accepting these kinds of alter~~ations~~ in adulthood is much too difficult.

Furthermore, keeping adapted ~~with-to~~ this speed makes ~~a~~ lot of effort and increase ~~in~~ the level of stress. This much pressure not only lessens~~s~~ their efficiency but also affects their health.

In addition, youths, who are newly graduate, are more ~~incentivemotivated~~. Starting their journey and provid~~inge~~ for their future family, these fresh outs have higher rates of life expectancy, so they are motivat~~eding~~ to take risks and dream~~ing~~ big.

In conclusion, although this ~~mandatory obligation~~ results in depression for retired persons, I believe we should give this chance to young people to change our world for better.
