

More and more people nowadays are buying fashionable clothes. Does it have more negative or positive effects? Give reasons for your answer and include relevant examples from your experience.

Nowadays so many people tend to follow mode in what they wear. While there are certainly valid arguments to the contrary, I personally believe that the benefits of purchasing stylish outfits far outweigh its drawbacks. This essay will elaborate the advantages of this with some outstanding instances.

On the one hand, Purchasing in any form if managed carefully, can increase the money flow index in a society, and this means more jobs in brief. In other words, encouraging people to be stylish (modish) strengthens the economy by creating new jobs in many fields. In fact fashion these days is not just a simple clothing, it is a big industry with a wide range of demands. Fashion designers, tailors, hairdressers, models, sellers, and drivers are just some a few apparent examples of this industry. Turkey is a successful example in this industry with a very acceptable/significant income from exporting clothes worldwide. They it succeeded to-in create so many jobs by attracting tourists who visit Turkey every year for reasonable prices for high quality and fashionable clothes produced in this country Turkey.

On the other hand, too much attention on-to mode and stylish wearing has some disadvantages. First and foremost, this requires many young models who mainly suffer malnutrition. They refuse to have enough food to stay fit and shapely. This especially in girl models appears as a kind of obsession in their eating habits. Lots of supermodels them follow terrifying tactics to stay thin, and every year we hear about the death of young models owing to the tough diet they follow. Admittedly, persuading people to wear fashionable clothes may cause waste of considerable amounts of money in families. In fact, this budget can be used for educational purposes rather than clothes.

In-by way of conclusion, I think not only does-is spending on fashion is-not a waste, but rather also-is a way of boosting economy and setting in motion the wheel of economy moving industrial gears. That a dynamically happy society needs different fashions and lifestyles is an undeniable fact, so I strongly agree with the idea of encouraging people to purchase stylish clothes.
