Mobile telephones have brought many benefits but they have also had negative effects. Do the advantages of mobile phones outweigh the disadvantages?

Nowadays, the mobile telephone is one of the common electrical devices which plays essential roles in Humans' lifestyle. Howeveralthough, less than one century ago Mobiles came to our world, we cannot ignore their speed's development speed. Prior to the advent of cellphone Before cellphone's coming, we had to wait for communication with someone until he they arrived at his their house or office but today this problem is has been solved by this new item. I will be discussing about the advantages and disadvantages in more depth.

Conversation is not <u>the</u> only beneficial reason to admire a cellphone. We should mention many services which we <u>use will meet</u> every day. Many say it is an enjoyable product for entertainment by listening <u>to</u> music, watching movies, chatting or surfing <u>on</u> the internet. You <u>are</u> never lost anywhere because factories have set the GPS technology and you can see your location <u>in on</u> the map on the screen.

These days, enormous kind-numbers of applications are invented ing for learning, shopping and more besides. Several significant effects not only will increase grow sharply but also we cannot live without it-them even for a moment while.

A reason which convinces me to claim my disagreements is the facilities of mobile telephones whether waste lots of times and instead of face time, face to face relation we use social network programs.

Second, people face dangerous waves. In other words, in order to scientists have proved more harmful assessments about noises and waves on body and have expressed negatives effects factors on the brain and eyes especially in during rest time.

Finally, we should take on the huge burden of utilizing it by which I mean we can decline negative points and control time in the best way, at last, we can say it is one of the best investments of the mankind in the world.
