

In many countries plastic bags are the main source of rubbish causing pollution in oceans and on land; therefore they should be banned. To what extent do you agree or disagree with this statement?

These days in many parts of the world people are dealing with plastic bags as an environmentally important issue. Not only are these bags the major source of water pollution, but also many an animal perishes es owing to their ingestion ~~of the bags~~. When it comes s to this notion, I strongly hold the idea of banning or at least introducing laws to restrict this easy usage of ~~them~~ these bags this much easy. This essay will elaborate my stances s as to imposing protective laws to constrain production, usage and disposal of this material.

Mainly made of crude oil and natural gas, plastic bags are made ~~of from~~ nonrenewable resources. According to a research conducted by university of California, Berkeley, z production of nineteen plastic bags is equal to drivinge a car for a half mile. Disappointed ~~of with an~~ ever-growing trend of usage of plastic bags, environmentalists s, along with scientists z, are trying to enlighten people about the irreversible ecological impacts of these ~~not non~~-degradable materials. That we are consuming our invaluable mineral resources with /at an unreasonable speed is an undeniable fact.

Equally importantly, these plastic s have a crucially important role in polluting seas, rivers and wildlife in general. Many sea creatures and birds die because of disposed plastic bags. In fact they cannot recognize the ~~dangerous dangers~~ behind ingestion of plastic materials z, hence their health-threatening digestive problems system and death by starvation. Birds z, on the other hand z, may get caught in a trap made of mass of plastic bags leading to their death.

By way of conclusion, I once again reaffirm my position that usage of plastic bags has brought about so many ecological and environmentally impact around the globe, and I strongly support the idea of banning usage of plastic bags in the current way ~~we are currently using~~. I hope to see a day when no animal loses its life owing to misuse of plastic bags by humans.
