Smokers can cause themselves serious health problems. The choice to smoke is made freely and knowledgeable of dangers. Smokers should therefore expect to pay more for medical treatment than non-smokers.
To what extent do you agree with this statement?

Crucial perils of smoking have been proved to human beings all over the world. Hence, smokers are aware of ~~the~~ side effects of this habit, so they impose a higher treatment fee.

The most preventable lifestyle factor affecting passive smokers' health, the ~~odor~~ fumes of cigarettes, causes the high risk of getting cancer as much as active smokers. Therefore, not only does smoking ~~has~~ have a myriad of negative impacts on active smokers but also it has harmful effects on second-hand smokers and they need to spend money on destructive effects as much as active smokers. Nevertheless, it is possible for these people to be away ~~of~~ from smokers. For instance, active smokers can smoke outdoors and non-smokers will not be exposed to smoking.

Besides, tobacco has ~~sort of~~ negative impacts on mental and physical health. To illustrate, blood pressure and heart attack are the examples of these health problems and smokers ~~impose~~ are forced to spend much more money for these types of diseases.

On the other hand, based on the recent statistics the researchers claim that Nicotine provides a long list of mental illnesses such as depression. One of the most important problems among the negative effects of mental illnesses, the tendency to smoke more cigarettes, causes smokers to waste money on smoking. Actually, they believe that smoking increases their anxiety. After a while, they ~~deduce~~ realize to take some ~~trophy~~ therapy to stop smoking and improve their mental problems which refers to one aspects of paying money ~~on~~ for smoking side effects.

In conclusion, it is totally clear that smokers pay more money than other people because of the mental and physical problems made by smoking. However; for any other illnesses they need to pay same as non-smokers.
