

Some people believe that allowing children to make their own choices on everyday matters (such as, clothes and entertainment) is likely to result in a society of individuals who only think about their own wishes. Other people believe that this is important for children to make decisions about matters that affect them.

Discuss both these views and give your own opinion.

To some, permitting children to make their own choices on their daily-life matters without any rule is one of the reasons that they might not be accepted in their society. Whilst others believe that the liberty of children in their own decisions is quite practical to them. In my opinion, parents play a pivotal role in these decisions for their offspring because ~~of that~~ they cannot distinguish between right and wrong.

On the one hand, according to experts, today's children are the king of the homes ~~that this~~ which is due to their parents' behavior. For example, some permissive/lenient/easy-going parents ~~who their~~ whose children are free in their decisions in many areas, often ~~is spoiled~~ spoil children. Absolutely, this kind of upbringing will have detrimental effect on children's s personality and thinking pattern, so that they will be self-centered and self-absorbed persons. Moreover, the choices of children in some cases are not appropriate ~~to for~~ for them. For instance, choosing a favorite meal by children might lead to unhealthy foods such as fast food and also fatty foods. Therefore, parents should guide their children in order to ~~avoid prevent~~ prevent health problems in this field and other areas that children have lack of knowledge as well.

On the other hand, parents should trust ~~to~~ children in their own decisions. On the basis of findings, children who are fragile-minded with lack confidence due to their families' behaviors ~~is~~ are often weak persons and without any idea. While, those who are independent in making their own decisions such as choosing their clothes or some entertainment -that are not more vital to them- will be happier and stronger than the first group.

To conclude, ~~the~~ parents, ~~who are~~ not strict about their children's s decisions ~~who and also they~~ try to help them in some hard decisions are as thriving-successful as other parents.
