In many countries there is an increasing number of couples choosing to have no children.

What are advantages and disadvantages to couples having no children?

If we flashback to our previous generation, we find out that parents tend to have more than four kids. But as time passed by parent's tendency for having ~~less~~ fewer or even no child has been ~~increased~~ become more widespread drastically. Some people ~~believe~~ regard ~~that~~ this issue as benefici~~alt~~ to ~~of~~ couple's life, others are ~~on~~ of the thought that this issue can ruin couple's life.

There are so many people who consider child~~ren~~ ~~as~~ necessity and the spice~~s~~ of life which can change the life path completely. These people believe that couples will not sense the beauty of ~~the~~ life. Also, their life would be dull and monotonous. On the other hand~~s~~, when couple~~s~~ age, there would be no one to rely on or be there when they need someone and they will go through so many hardship~~s~~.

Nowadays we could see ~~that~~ the growth of the tendency to have no children. First of all, these couples say that without a child, they have ~~less~~ fewer responsibilities ~~then~~ than when they have one and as a result they could take care of their life better. Secondly, they believe that they could spend less money and save more when they have no child. Finally, they are ~~on~~ of the opinion/thought that they have more free time

In conclusion, I am of the opinion that having children is the nature of married life and it is inseparable so couples should have children in the appropriate time. Those who prefer to have no child will face problem~~s~~ in the long term.
