

Write a letter to your landlord about the problem with water leak in your house. Please say

- What is the problem?
- What is the source of the problem, in your opinion?
- What do you think needs to be done?

Dear Mr Jefferson

I am Saman Jourablou " your tenant on unit 20, the building number 307, on Riverside street". I am writing to express my inconvenien~~ce~~ with the problem which has occurred in my rental apartment.

Actually, the issue is the water leaking of from the ceiling of the apartment. Since yesterday, when the weather started raining I have faced this problem.

In my opinion, the main reason of this problem is the lack of standard insulation of the roof. If you remember, the last winter I warned you that the quality of the material which is used to for insulation is not suitable, but you did not pay attention, so now this event incident has happened.

In my estimation, it would be a good idea that you called an expert and asked him to renovate-reinstall the insulation of the roof of the building with high quality material.

I am looking forward to hearing from you very soon, before that such issue ends up with the more damages to the apartment.

Yours Sincerely

Saman Jouraablou

**In cities many people are living alone. What are the reasons for it? Is it a positive or a negative trend?**

It has argued that nowadays a large number of individuals are living alone in the cities. In the following paragraphs I am going to talk about the emigration as a main reason of such a trend and also I will explain my disagreement with such an approach by mentioning depression and increment of the crimes rate as consequences of this issue.

According to the introduction of this essay I believe that the most important reason of such a problem is due to the emigration. In other words, in this day and age, thanks to the much more job opportunities as well as better educational facilities in the cities compared with the countryside, the more people especially the young generation, those -ones who are job seekers or want to continue their academic educations prefer to live in the cities. Moreover, by the reason of the high life expenses in the cities such emigrants cannot afford to bring their families with themselves, hence the increment of population of people who live alone in the cities.

I strongly oppose this trend and in my opinion it will bring about some mental disorders such as depression and in long-term it will lead to the a surge enhancement on in crime rates. In other words, the more time a person lives alone, the more he/she is prone to the mentally problems which is due to the lack of a partner or somebody who to-plays the role of a patient for them. In addition, the houses where only one person lives are more prone to be a place that crimes happen there. For instance, the thieves prefer to attack to-such less crowded homes than houses-those with more residents. Besides, the pressures which are due to the-living lonely sometimes push the individuals to do some dangerous behaviors such as abusing or sexual harassments which rarely happen in family houses.

To sum up, according to the above paragraphs it is necessary that officials prepare more facilities to every sides of the country, not only in rural areas but also in small cities to prevent the approach of emigration to the cities and living alone there.
