

Today more and more tourists are visiting places where conditions are difficult, such as Sahara desert or the Antarctic. What are the benefits and disadvantages for tourists who visit such places?

A significant number of adventure travelers ~~have~~**has** sought untapped and insurmountable destinations over the last few decades. These people are driven by their thrill and passion to achieve something unbeatable to others as they tend to satisfy their instinct. This adventure may come at a price for the travel seekers every now and then despite the excitement it brings on.

First of all, tourists travel to remote destinations to **sap** their energy and passion. Achieving unconquerable locales, they will find it thrilling and energizing. To elaborate, these people are ambitiously curious for which they embrace the travel perils cordially. The thrill that made Columbus ~~seize~~**explore** America is just a case in point. In addition, the adventurers intend to **weigh up** their ability and resilience. In that case, they will feel like heroes as they have ~~got over~~**overcome/surmount** the hurdles if victorious, hence satisfied with their stamina helping them in their personal life.

Precarious trips, however, bring about some drawbacks. ~~That is to say~~**To put it another way**, these risky adventures may have adverse impacts on their health. To explain, they will suffer from life-long injuries occurring throughout the journey, or they may be found missing. Furthermore, as their experience might take its toll on travelers, the governments and rescue operators may fall into trouble saving them.

To recapitulate, it seems that although risky travels may quench ~~perpetrators'~~**risk-takers'** thirst in one way, they will encounter detrimental problems on the way ahead of them**selves**.
