

Life is easier now than the past

Many people maintain that persons in these years have a pleasant life. In my opinion many effects are causing that living in these times become much more easy than the ancient times. On the other hand, when we need some object we can prepare it in our country, as well as we have development in technology, also transportations are improved. These factors have had powerful impact on each side of resting life.

First, in the past many people needed very necessary-necessary items but they could not access it easily. For example, a friend of mine told me a real story of her grandfather's fate. She pointed out that he had a-cancer but there was not any doctor to treat him, and he should go to another country to visiting the special surjensurgeon. In addition, some crucial material were not in hand such as drug, fruit, clean water also even some kinds of food.

Second, I strongly believe technology made our life pleasantpleasant. Nowadays many tasks are done by Internet. Actually, you can send your mail by Email, also you can participate in your sessions, see your close friends at home by videophone. Moreover, the cellphones have important role in our daily life.

Third, in-these days transportations are extremely improved and became better for individuals. for instance, during our grandmothers' childhoods they were going to far destinations by horses. However, now we have fast and comfortable transportations like airplane, subway, bus and car. So, people can reach to their goal by using these. In the other words, some times your job is in another city and you have to go there every day but also there is no problem because you can use the subway or airplane.

In conclusion, this modern world make the-life easier than past and people do not need struggle with superficial requirements. Therefore, I maintain that todays we can have more enjoyable life than past.
