

Should parents be obliged to immunize their children against common diseases? Or do individuals have the right to choose not to immunize children?

Why is your view in this practice?

Give reasons for your answer and include any relevant examples from own knowledge or experience?

Some people argue that the state governments ~~does-do~~ not have the rights to ~~imposing-impose~~ immunization ~~to-on~~ parents for their children. However, I would suggest that this practice would ~~adhere-protect~~ children not be infected by harmful diseases. In this essay, I would present the right side of this practice with appropriate examples.

Preventative medicine ~~have-has~~ proved to be the most effective way of ~~reduce-reducing~~ the fatal childhood diseases. This has benefited overall. Immunization is quite common ~~to-for~~ children ~~in-these~~ days, it is practiced mainly in cities and reaching ~~to-the~~ countryside by the governments after they impose it must be practiced. The governments have taken many steps to support these practices and hence results are visible ~~at-on~~ a large scale. ~~The~~ diseases such as polio ~~has-have~~ been completely removed from countries like India and many others.

Serious diseases such as polio, smallpox, influenza and tuberculosis come under the national immunization program. As a consequence of this program the children are immunized and remain disease-free and benefit society overall. Parents should follow the instructions for this program to support their nation. Water ~~prone-borne~~ diseases, poor hygiene can cause many problems ~~for-to~~ children whose ~~immunity-immune~~ system ~~has~~ not developed yet and clean water is limited. So ~~by~~ providing the proper vaccination on time would reduce the chances of infections.

In summary, I would say this practice ~~have-has~~ several benefits and provides assistance to society. If parents think not to follow these programs, ~~it~~ would lead to many consequences ~~to-for~~ their children. I believe nobody should suggest ~~to-reverse-reversing~~ this process.
