

## Writing Task 2 Cambridge book 13

In some areas of the US, a “curfew” is imposed. In which teenagers are not allowed to be out of doors after particular time at night unless they are accompanied by an adult.

What is your opinion about this?

Curfew is a challenging issue that people all over the world discussed ~~about it~~ at least one time in their lifelong. Some people argue that it is an appropriate measure to impose a curfew for children after exact time at nights whilst others claim that it will limit children’s freedom. In this essay, ~~we-I~~ will consider both attitudes s toward this subject.

Proponents of the curfew idea point out that this law is enforced for children not against them. Some children’s rights unions believe that it’s much more-safer for children ~~to~~ not to go out late at night because there is an abuse possibility by drunk ards and drug addicts people or even delinquents. Another significant reason is this rule ~~hydrate-hindersfrom~~ being awake until midnight which helps s to improve their life quality and improve their concentration ~~during-when~~ their attended-attending classes.

On the other hand, another group of people claim that curfew will take children’s freedom to make a decision even for the initial subjects that affect their daily life. Moreover, this will impact their future lifestyle, some of them inclined to hanging around at late night when they grow up, just because there are deprived from this right in their childhood. Opponents of law, expect the government to provide more secure environments in society instead of putting the limitation for children.

Based on my understanding ~~from-of~~ the subject, I ~~personally~~ believe that it’s not fair to impose a limitation ~~for-on~~ children. To make a long story short I reckon that putting limitation in ~~nowhere-anywhere~~ cannot work successfully. If there is a strategy behind government decision, it’s better to announce it vidly-transparent and expect people to obey the rules by increasing public awareness toward of the issue.

To conclude, irrespective of the idea behind the curfew, some people support it while others reject this rule. Although maybe there would be some advantages for children by curfew ~~but~~ there is no proved reasons which show it is beneficial for children. It would be better if the government with the assistance of people create d a peaceful and secure atmosphere in society to allow all people enjoy it and choose the propitious time of going out which best suits s their personal life.
