Do u agree or disagree with the following statement? If people have the opportunity to get a secure job, they should take it right away rather than wait for a job that would be more satisfying.

Finding a job is a crucial subject which individuals pay attention to. Many a person has tasks as work or searches for positions opportunities. Some people maintain that it is more suitable to find a stable situation than a changeable and risky posting.

However, others claim that the main goal of a post is having satisfaction of it. In my view, sometimes having a secure place outweighs s the other positive points.

First, many individuals argue that we should try to obtain a fixed position and have an income of that. In fact, they hold that not only is making money a main purpose of doing the practice but also finding a firm place can bring us happiness, too. We can make enough money and have stable financial situation thereby having sweat pleasure, as well as doing hobbies, and buying expensive stuff that make us satisfy. For example, a friend of mine living in California is a firm employee with excellent salary. Although, she

doesn't like her career, she believe that she can have proper future comes from this position. Furthermore, she would like to become professional tennis player and she is glad due to affording the costs of its coach.

Secondly, other people state that we should enjoy our life in each position. Moreover, spending most of moments of life during work time, they swear that the job should be pleasure, as well as enjoying for them.

Besides, the yield of a satisfaction job has done by a blessed one can bring large amounts of admirable results, in a short time, though. In fact, they point out that not only is lifetime too short but also it passes extremely fast, so we should live life. ~~Due to~~since a job takes an important and major part of ~~aliveness~~life, it is more suitable to selecting the favorite situations than secure choices. For instance, my best friend works more than ten hours ~~in~~ a day and she really likes her duty which she has special intelligence on, thereby having achievements.

Finally, I personally believe that we can't generalize it and should consider moderation. Actually, I mean that for some of the individuals, financial and economic aspects of a place ~~is~~are profitable, others take care of

acceptable and gratifying features of one, though. Hence, depending on different people, choices are divergent. However, sometimes some positive points can fill some gaps, and money can be a proper solution to doing boring practices😊, thus it is worthy to stay ~~on~~ in secure positions.

By way of conclusion, from my perspective selection is subjective but fixed practices with outstanding money bring happiness. Although, there are some claims which state are told that finding a firm position can build a properly gainful future, other beliefs are mentioned that agreeable work is the main purpose. Unless,if we know what kind of jobs can satisfy us, we can examine each of them and see their consequences.
