

Some people think that it is better to educate boys and girls in separate schools. Others, however, believe that boys and girls benefit more from attending mixed schools. Discuss both these views and give your own opinion.

The controversial debate of mixed schools and single ones is constantly a serious issue for every country except Islamic countries where which scholls are always separated. Although a complex-mixed environment has its benefit for students, the drawbacks of this are much-extremely clear. Parents can play a pivotal role in this area as to how they can rear their children and what are the education and behavior factors, they desire their charges to achieve.

On the one hand, some argue that the children who attend mixed schools will ~~be~~ learn how to communicate with different genders for now and future. Nobody can deny that for all of the acquired skills, human beings need to be educated by their ancestors or an organized system. It is a fact that all parents and schools' authorities should instruct children how to behave with-toward each other especially with their opposite sex. There is an enormous responsibility for them to have a classified plan for training new generation. No matter how much they are in touch with each other, it leads to knowing each other better which is an important principal-principle for their marriage in future. Obviously, they can find what an advantage of their opposite sex is and learn to appreciate their intention. These are the key factors of-in having a friendly family and healthy society.

On the other hand, opponents claim that there must be a separation between girls and boys during schools' day, so both groups can concentrate on their lessons without any distraction from the attraction of opposite genders. They heartily believe that the presence of girls and boys together leads to ~~a~~ huge issues such as falling in love with each other in-at a young age, probably, having pregnancy for girls in high schools and spending more time hanging out which causes them to waste their time instead of studying and exercising which are suitable for them. Moreover, this situation brings about wasting-spending their money due to purchasing some presents or tickets of cinema or a coffee in the café.

To sum up all the statements above, I have to say what is more important for all types of families such as religious, none religious, educated, nobility or sensitive is to face meticulously their offspring and also their families' etiquettes for the sake of enrolling them in which types of schools, Because of the difficulty of this issue, there is no absolute method to cope with it. Without a doubt, the distraction in mixed schools is more than in singles ones and sometimes the truth-fact of ~~the~~ high grades which are achieved in single schools are-is not deniable.
