Mobile phones and the internet have made it easier to stay in contact with other people .however, as a lot of time is spent using telephones and computers, there is less face-to-face contact and direct communication.

Is the growing use of communications technology a positive or a negative development for society?

.....

Today, cellphones, computers, social networks and virtual world help people have <u>an</u> easier contact when far from each other and on the other hand overusing this communications technology <u>cause</u> people <u>drifting</u> apart from each other when they <u>gathering</u> together in one place for <u>meeting</u>.

<u>In</u> my point of view, although the computers and mobile phones have advantages <u>but</u> overusing of these devices has disadvantages.

If we <u>remembered</u> a few years ago when we <u>wanted</u> to <u>found find</u> and <u>had contacted</u> our families or friends, we <u>forced</u> to use a telephone in our homes and if <u>he or she</u> was not <u>behind the line</u> in <u>his or</u> <u>her homes</u> we could not communicate with <u>him or her</u>. But today, <u>mobile phone</u> is one <u>of</u> the useful inventions helping people <u>finding</u> each other and have contact whenever <u>their they</u> want.

Computers, laptops, are <u>design</u> to <u>installing</u> software and <u>program help</u> people do their <u>works</u> or projects easier or make it possible by email to contact <u>with</u> manager, office or universities. Also there is another application that computers have for children to <u>playing</u> games.

On the other hand, some people have become addicted to their devices, when these people <u>gathering</u> with their families or friends in any places, they <u>staring to</u> their screens and do not have any communications with the others.

In conclusion, mobile phones and computers or <u>whatever</u> help people to contact each other are <u>produce</u> to make it easier <u>communications</u> and it is very important <u>to</u> everyone to <u>using it in</u> right moments and places and avoid <u>from</u> overusing <u>them</u>.
