

In the early 21st century, many cities are being rapidly redeveloped. In this process, the needs of special interest groups, such as people with physical disabilities, are sometimes taken into account.

The process of developing cities increased hugely in this early time. In ~~the~~ way this regard, many didn't get the opportunities or facilities in ~~a~~ society. Like people with physical disabilities. I would like to pay my whole own opinion about this situation.

One of the most important items s is having financial support or economic stability in their life. With disabilities, it is hard to get a job in a company ~~in~~ for some reasons. ~~It may considered~~ the kind of job or the rules of company may be considered. Although, in some ~~country~~ countries getting a job is hard for a fine person, ~~so~~ they need help to access a fixed monthly income.

In daily life, we can see they have many extra challenges ~~to end a~~ during the day. Usual problems for people like the Blinds. When they want to walk in sidewalks or ~~crossing~~ street. Using a stick is very old. They can have new products with ~~satisfactional~~ satisfactory options like using sensors or voice recommenders s. Now in the most cities in less-developed ~~country~~ countries like Tehran, governors ~~doesn't~~ not care much about this issue. At least they can build ~~a fulfilled~~ suitable sidewalks with exceptional yellow or other color tiles. I think, even Blinds ~~donare not~~ t allowed to use dogs to find the way ~~to~~ home.

Educational needs are important as much as others. Like learning sign languages s with special tutors for the ~~hearing~~ impaired hearings. I remember, Helen Celer as a legend, how she succeeded ~~to in~~ reading, talking and writewriting.

In conclusion, disabled people ~~may should~~ not ~~to~~ be ~~neglected~~ ~~passed~~ in ~~all-~~ ~~any societies~~ society. They have the rights to have minimum equipments like others to improve their lifestyle for better life.
