

A person you know is planning to move to your town or city. What do you think this person would like and dislike about living in your town or city? Why? Use specific reasons and details to develop your essay.

Owed-indebted to the new forms of lifestyles generated by modern societies, freedom of choosing the place an individual **appeal-is willing** to live is gradually becoming a world-wide**ly** accepted phenomenon in human life whilst our historical counterparts mostly were to pursue their ancestors' way of almost all aspect**s** of living, including that of the place. A friend of mine is going to immigrate to where I am living and I think he will face some unexpected condition**s** in the pros and cons of it.

To begin with, enjoying **from**-the uncountable **fo**unds circulating in every socio-economic structures and institution, not only can metropolises offer their citizens lots of highly **southsought**-after opportunities in terms of educational and professional careers but also they equip their residents with a rich pluralistic outlook generated by a plethora of sub-cultures coexisting together in one place. Additionally, "there is a lot to do" is a common statement in describing a big city which can include many activities like going to museums, theaters, parks, malls, restaurants, and many others. Provided with these accommodations, my friend will be definitely fond of my city.

The reverse **/flip** side of the coin ushers us to some familiarly dark aspects attributing to these types of cities. Humped by an enormous population, big cities will fade the self-identities step by step. In fact, psychologically many **of-a** resident shows a kind of depression caused by the feeling of being humiliated in metropolises by the scales which relates to not only the population but also everything constructed in **the** most parts of these types of cities like skyscrapers or highways. Moreover, suffocated by almost all identifiable kinds of pollution**s**, metropolises rarely can make a healthy choice for people who are seeking **it**, especially those coming from a well-conditioned little town like my poor friend.

In a nutshell, it needs thousands of papers to investigate this very issue but for him, **the** advantages will **overweigh-outweigh** the downsides although these pitfalls have damaged the otherwise perfect credibility of my city.
