

Some people think that government ~~in-is~~ wasting money on the art and that money could be better ~~spend-spent~~ elsewhere. To what ~~extend-extent~~ do you agree with this view?

There are numerous opponents on the governmental budget for art, disagreeing with spending national funds and financial resources on that field and related activities. They found it unnecessary and argue that this huge amount of money can ~~be invested on-in~~ other important majors like health areas or welfare issues.

While in some developing countries ~~which-where~~ the ~~fundamental structureinfrastructures~~ are ~~under-~~inadequate ~~content~~ it would be logical and ~~knowledgeable-understandable~~ that a significant ~~amount~~ of saved wealth be allocated for the most ~~initial-basic~~ needs like food supplies or potable water, it could be generally different in developed countries. As public population ~~pass-throughgo beyond~~ their first needs, it would be predictable that their ~~stage-status~~ will ~~be level-elevatedup~~ and changed ~~ly~~, so that the new ~~sight-point~~ of view will be born. Certainly the first aspect of these new attitudes' generation will be called as art. It ~~it~~ would be difficult to describe a complete and clear definition of this word, though anyone has experienced it several times ~~on-in~~ his ~~lifelonglifettime~~.

Meanwhile some people believe that the art field is luxury and unnecessary there ~~is-are~~ many ~~pieces~~ ~~of~~ historical evidences which ~~proof-prove~~ that art ~~are-is~~ able to impress ~~on~~ human beings' emotions or can reflect our feeling not only in romance and love but also in violence and war. The art can be distributed all around the world in a new common language in ~~a~~ peaceful way. During the world wars in the midst of death and destruction the art shows people's disagreement ~~to-with~~ their governments. It is ~~a~~ universal weapon and the ~~basin-source~~ of hope and appointment.

So it could be hard to eliminate art and who would be able to imagine the world without art??

In conclusion as ~~men-mankind~~ needs accommodation medical care and ~~so-another needs~~ for their body they need proper attention ~~on-to~~ their mind and sense of humor. ~~The~~ Whole of this ~~object-~~~~subject~~ could be acceptable if anyone ~~went-onstruck a~~ balance ~~and~~ in their ~~ir~~ ~~associated-proper~~ time and place.
