Some business now say that no one can smoke cigarettes in any of their offices. Some governments have banned smoking in all public places. This is a good idea but it takes away some of our freedom.

Do you agree or disagree? Give reasons for your answer .

Nowadays, everyone is aware of disadvantageous in smoking and new regulations have been implemented in public places even in companies regarding banning this action. I am completely concur that this law should be carry out throughout the world.

Some groups are of the thought that this banning benefit us and society because ,firstly, the illness which is due to smoking, involves some expense and most of these diseases would lead to death. secondly, smoking in public places can ruin image of country or it can corrupt reputation of a company, that is why this action should be limited in public places. Countries like Spain has strict rules regarding smoking that's why the number of smokers has fallen to 22% because in this regulation this action has banned even in outdooroutside of restaurants or bars.

Others believe that this restriction result in limitation of their freedom because it's impossible to smoke wherever they want, despite being aware of the health risks posed by smoking. Although, this legislation effects affects all the smokers, the government and companies have solution in order to solve this matter by providing some free smoking zones which has provide great condition for smoking.

The main conclusion to be drawn is that, I believe smoking has no advantage for us and this regulation should be implemented in order to deter some sever consequences.
