

Task 1
Cambridge 13- test 4

The diagrams illustrate some alteration to a university sport center which will be redeveloped over the time.

A glance at the layouts demonstrate that the sport center will be facilitated considerably and some new features can be seen in the second diagram. The main development is the leisure pool next to the west side of changing room.

Looking at the maps in more detail, it can be observed that an extended leisure pool will be built on the west side of the previous pool. The other physical structures that will be added are café and sport shops near the entrance at the south of the center. There is a changing room near pool now. More over, 2 new changing rooms will be built at both west and east sides of this recreational center.

As well as the areas mentioned above, the out door courts will be destructed and exchange with new regions and facilitated areas. Further more, the gym will be extended from east corner. 2 dance studios are going to be constructed beside sports hall where is located near seatings at the east part of the sketch. Finally there will be no alteration on changing room, pool and seating-reception areas.
