to me

In many countries the level of crime is increasing and crimes are becoming more violent. Way do you think this is and what can be done about it?

Is spite of the considerable number of prisons which are being built in most parts of the world, ~~but~~ many nations are witnessing a drastic rise in crime rates and deleterious impact on them as a whole.

In my opinion, one of the main causes the perpetration of a crime is increasing is the gap between ~~stratums~~ strata of society which is caused by lack of employment opportunities and also income inequality. Although solving these issues ~~are~~ is not easy, governments should adopt proper polities and an accurately enforce ~~of~~ them~~which~~ to creat~~e~~ing job opportunities without any discrimination. Moreover, it should not lay the blame for all of the illegal activities just on unemployment, so the other reason that plays a crucial role is education. Not only must the education system be made publicly available but also criminals need to be trained and rehabilitated so that they can re-enter the workforce. in addition, the growing trend of young people's interest in computer games is one of the effective factors in increasing violence as well as focusing on this subject can prove~~d~~ that sometimes people even ~~ones~~ those who generally are law-abiding citizens to commit petty crimes such as victimless crime.

Ultimately, authorities need to focus more attention on crime prevention and educating youngsters to abide by the law and furthermore providing employment and also breaking the cycle of entering a life of crime in the first place for people and above all it is time to provide maximum governance to citizens and amend~~ing~~ the ~~existence~~ existing laws.
