

*It is important for children to learn the differences between right and wrong at early age. Punishment is Necessary to help them this distinction.*

*To what extent do you agree or disagree with this opinion?*

*What sort of punishment should parents and teachers be allowed to use to teach good behavior with children?*

The distinction between good and evil or right from wrong is one of the crucial ~~stuff issues~~ which parents and teachers should consider at the early ages of a child because at this age the child's character ~~be is~~ formed. Although some parents and teachers ~~are~~ agree with punishment I entirely disagree. Punishment is not necessary because this method might be harmful for them.

Teaching children at the early age could directly ~~effect on~~ affect a child's future, ~~therefore,~~ learning and ~~create-creating~~ the ability to telling wrong and right is one of the most important parent's duty. Choosing the best method to obtain this goal is more necessary than punishment. Punishment in early ages might entail many negative consequences. Therefore, ~~to~~ considering the age of a child is important.

I mean that, ~~to-for~~ younger group ranges ~~ofof-group~~ parents and teachers could superseded punishment ~~to~~ with other methods such as detention, withdrawal of privileges or even time-out and in some rare cases smooth punishment instead of cruel or harsh one. One of the most important factor for learning different between right and wrong are the models. Parents, teachers and even family are main models for children and for good parenting, they should try to provide good role modeling by their own behavior. Another factor is considering to the child character. Parents ~~s~~ should ~~allowed to~~ their children to ~~telling-tell the~~ truth without any panic or stress for being punishment. In consequences, ~~parents~~ and teachers ~~are-play the~~ main role ~~led~~ and making assessment to the children's age and character and giving them space are so impressive to the child's upbringing.
