to me

Some people believe that poverty has many faces , changing from place to place and across time ,and has been described in many ways .Indeed, poverty is a condition in which a person lacks of the financial resources and essentials for the minimum standard of living .

Poverty is a complex societal issue.At ~~a~~ first glance ,the causes of poverty are quite ~~overwhelming~~difficult to deal with.In addition to lack of money ,poverty is about not being able to participate in various activities or send children on a trip.There are some primary causes of poverty which have impact on society , like a lack of education, unemployment, inflation , poor government policies , overpopulation, world hunger.

Meanwhile, poverty increases the chance of poor health . Not only is poverty a cause , but also its a consequence of poor health .On the other side,health insurance is critically important for poor people and it helps to make health care accessible, keep people healthy and cover health care costs .

~~To~~in my view, there are some possible solutions which can be implemented in order to ~~make~~ameliorate better the poverty situation.The first ~~indicator~~factor is to create more jobs.Secondly,the increase of minimum wage can be ~~an~~ effective help to avoid expanding poverty.

Last not but least ,the decent government policies would improve this matter

In conclusion ,I think reasons for poverty are history ,war ,political instability and discrimination.Poverty has become a great issue in our world.~~Th~~ough many organizations have been created to find solutions for this matter ,nobody could ~~not~~ save our world completely from poverty .
