

**Do you agree or disagree with the following statement?
In twenty years there will be fewer cars in use than there are today**

These days in an industrial world machines and specifically cars play an important role in our life. People see some advantages in using the cars so that they utilize cars even for minor ~~works~~affairs. Cars are becoming more comfortable and cheaper. As a result, more people are ~~encouraging~~encouraged to buy and use them. On the other hand, cars have some unfavorable effects, which can motivate people to leave their cars off. Furthermore, there may be some other reasons leading to ~~cease~~ceasing car usage, which in the following paragraphs, I will point them out.

Firstly, we cannot ~~denial~~deny and ignore the impressive effects of cars in our life. They save our time, make transportations easier and bring convenience to us. With the dramatic growth of urbanization, cars are becoming more and more important. However, besides the aforementioned profits, they lead to air pollution, heavy traffics and accidents. Hence, governments logically set some rules in order to alleviate their injurious effects. In some countries, ~~the~~ government has decided to improve and expand public transportations or the private companies such as Uber in the United States of America or Snapp in Iran, ~~make~~making it easier for people to take taxis ~~in~~ everywhere and every time. In other societies, legislators apply some traffic restrictions. On the other hand, the ~~re~~sources of fuels such as gas and coal are limited and most countries endeavor to use them for purposes that are more vital.

Most importantly, the world is drastically moving forward to a virtual universe. Due to the advancement in the field of artificial intelligence, the number of virtual businesses ~~are~~is rapidly increasing and by using ~~the~~ internet, we can effortlessly compare goods and buy whatever we need. As a boss in a company, you can contact ~~to~~ your team and ~~get~~give them ~~advice~~advises ~~to~~ them. As a teacher, you can teach your students without ~~need to~~ a board and physical class and as a counselor or therapist, you can communicate with your clients and establish a deep therapeutic bond with them. In conclusion, people will manage and do their work necessities at home.

In sum, ~~however~~although it seems that in twenty years the world will become more machine-made, I do believe that people gradually become more aware of the disadvantages of cars for environment, such as global warming. Moreover, the importance of cars in everyday life will fade if the companies and businesses expand the use of internet.

China cannot be trusted. However, we have no other choice.

Although china cannot be trusted, we have no other choice.

Although she is 70, she runs like a teenager.

She is 70. However, she runs like a teenager.

However beautiful you are, you will not escape this time

However deep that is, you may never end up in heaven
